

EDUCATION

B.S. Mathematics, concentration in Business, Purdue University, IN

May 2025

Minor: Economics, Computer Science and Statistics

GPA: 3.7/4.0

Relevant Coursework: Data Structures, Algorithms, Regression Analysis, AI, Object-Oriented Programming, Data Mine, Statistical Theory, Statistical Quality Control, Probability, Differential Equations, Analysis, Financial Mathematics, Money and Banking.

RELEVANT EXPERIENCE

Data Science Researcher, Caterpillar Inc.

August 2023 – April 2024

- Developed a patented geolocation application using Python that optimized battery charging notifications for over 150 fleet operators, resulting in a 30% reduction in downtime and improving operational efficiency by 40%.

Finance Intern, Zebra Technologies, Malaysia

May 2022–August 2022

- Analyzed prospective investment opportunities using DCF and LBO models, providing key insights that increased favorable investment decisions by 10% within four months.
- Used Excel and Tableau to develop financial models and performance dashboards, streamlining data analysis and reporting for the Asia Pacific region.

Satellite Maneuver Software Developer, Viasat

August 2024 – December 2024

- Designed and implemented a satellite collision-avoidance tool, enhancing sustainability in low-Earth orbit (LEO) by accurately predicting and mitigating potential risks.
- Utilized APIs from Space-Track, Celestrak, and data visualization tools to merge and visualize space sustainability data, aiding in tracking satellite objects and mitigating collision risks.

PROFESSIONAL EXPERIENCE

Student Athlete Academic Mentor

May 2023 – Present

- Designed and executed tailored academic coaching programs for over 40 student-athletes in accounting, finance, and statistics, resulting in a 60% increase in average grades through enhanced note-taking and study techniques.

Research Assistant, Purdue University

May 2023 – January 2025

- Analyzed over 300,000 matrices using Python (NumPy, Pandas) and MATLAB for computational analysis, and optimizing solutions for quantum problems.
- Applied Support Vector Machines (SVM) and other machine learning techniques to develop efficient computational methods in quantum information theory, resulting in the publication of a research paper on Farkas' Lemma and Positive Semidefinite Matrices.

Data Analytics Extern, Mobalytics

August 2024 – September 2024

- Analyzed gameplay data to recommend improvements for hero optimization, resource management, and combat efficiency, enhancing both casual and competitive gameplay experiences.
- Developed and presented predictive performance analytics tools, helping players optimize hero selection and combat strategies in real-time.

Founder & CFO, Lucid Face Mask NPO

May 2021 – December 2021

- Started and managed a non-profit business selling face masks and accessories during the COVID-19 pandemic.
- Led the financial and marketing strategies, implemented cost-reduction strategies and optimized pricing, leading to a 70% sales increase and enhanced financial sustainability.

LEADERSHIP EXPERIENCE

Founder and Director of Operations, Purdue Venture Capital

September 2024 - Present

- Established the first student-led venture capital club at Purdue University, collaborating with industry professionals, including venture capitalists and alumni, to host workshops and speaker events.
- Developed and managed portfolio of investments, tracking financial performance and generating actionable insights.

Associate Analyst of Purdue Investment and Trading January 2023 - Present

- Conducted extensive research on various companies, analyzing their stocks and shares to identify potential investment opportunities.
- Presented findings to clients through persuasive pitches and developed detailed reports using CFA standards.

Secretary of Taylor's University Sports Club

January 2022 – December 2022

- Co-founded a sports club dedicated to promoting physical fitness and athletic activities among Taylor's University students.
- Managed and hosted a variety of games, sports, and events, providing students with opportunities to engage in healthy competition and teamwork, increasing club membership by 80%.

AWARDS

Creative Thinker of the Year Award by Bayer

December 2023

- Recognized for a top business pitch proposing an innovative, green prototype design for U.S. farmers.

Winner of American Statistical Association[ASA] DataFest

March 2023

- Awarded 'Best Business Application' in DataFest 2023, a national-level data science competition where participants analyzed pro bono cases to provide actionable insights organized by American Statistical Association(ASA).

CERTIFICATIONS

Securities Industry Essentials (SIE) – Financial Industry Regulatory Authority (FINRA)

December 2024

Financial Mathematics Certificate – Society of Actuaries (SOA)

December 2024

TECHNICAL SKILLS

Programming Languages: Java, C, C++, Python, HTML, XML, SQL.

Data and Visualization Tools: Tableau, Jupyter, MATLAB, Figma, Blender.

Machine Learning & Statistical Methods: Artificial Intelligence, Linear Regression, Statistical Modelling.
