PROFESSIONAL EXPERIENCE

Donate Equity

June 2025 - Present

Financial Analyst

- Built 3-year revenue and cash-flow forecasts in Excel and Python to guide pricing strategy and inform \$1M pre-seed fundraising plan.
- Developed investor pitch decks featuring market sizing, competitive benchmarking, and scenario-based projections, to support fundraising presentations to angel investors.

Caterpillar Inc

August 2023 - April 2024

Operations Research Analyst

- Developed a patented geolocation application using Python and API integrations that optimized battery charging notifications for over 150 fleet operators, resulting in a 30% reduction in downtime and improving operational efficiency by 40%.
- Analyzed operational cost data to identify \$2M+ in annual cost savings opportunities.

Zebra Technologies

May 2022 - August 2022

Finance Intern

- Analyzed prospective investment opportunities using DCF and LBO models, providing key insights that increased favorable investment decisions by 10% within four months.
- Used Excel and Tableau to develop financial models and performance dashboards, streamlining data analysis and reporting for the Asia Pacific region.

Purdue University

Founder and Director of Operations, Purdue Venture Capital Club

August 2024 - May 2025

- Established the first student-led venture capital club at Purdue University, analyzing early-stage startups for potential funding.
- Led investment due diligence, evaluating startup financials, market positioning, and growth potential.
- Hosted workshops on valuation modeling, financial statement analysis, and venture capital investment strategies.

Associate Analyst, Purdue Investment and Trading Club

January 2023 - May 2025

- Researched equities, bonds, and alternative investments, using fundamental and technical analysis.
- Created stock valuation models (DCF, multiples approach) to generate investment recommendations.
- Presented investment theses to club members using financial modeling and market research insights.

Finance and Accounting Mentor

May 2023 - May 2025

- Tutored and mentored 50+ students in financial concepts, including economics, corporate finance, accounting, and statistics.

Research Assistant

May 2023 - January 2025

- Applied Support Vector Machines (SVM) and other machine learning techniques to develop efficient computational methods in quantum information theory, resulting in the publication of a research paper on Farkas' Lemma and Positive Semidefinite Matrices.

Mobalytics

August 2024 - September 2024

Data Analytics Extern

- Analyzed gameplay data to recommend improvements for hero optimization, resource management, and combat efficiency, enhancing both casual and competitive gameplay experiences.
- Created Tableau dashboards to track in-game revenue metrics and user spending trends.

EDUCATION

- B.S. Mathematics, concentration in Business**, Purdue University, IN
- Minors: Computer Science, Economics & Statistics**
- Certifications:** Securities Industry Essentials (SIE, FINRA), Financial Mathematics (FM, SOA).

TECHNICAL SKILLS

- Programming Languages:** Java, C, C++, Python, HTML, XML, SQL, R.
- Data and Visualization Tools:** Tableau, Jupyter, MATLAB, Figma, Blender.
- ML & Statistical Methods:** Artificial Intelligence, Regression Analysis, Statistical Modelling, Data Mining.

AWARDS

Creative Thinker of the Year Award [Bayer]: Proposed an AI-driven irrigation and crop-monitoring solution, reducing water usage, improve crop yields, and reduce operational costs for U.S. farmers.

Winner, DataFest, American Statistical Association [ASA]: Awarded 'Best Business Application' for developing data-driven insights on a real-world pro bono case, transforming large-scale industry dataset into actionable business strategies.
